<p><b>THIS IS A REVISED LCR!!</b> This LCR must be revised because of collapsed conduit in the 4 1/2 alleyway behind the Huntington Work Release Center. The original job was to be worked on Frontier project 1206288. This revision will pl a 48 fiber cable from frontier manhole B3, underground 210' to pole 3/6. Then placing a 48 fiber cable 425', aerially down the 3 lead to pole 7. At this point the 48 fiber cable will be placed from pole 7 to a subscriber pole and cleating to the side of the Huntington Work Release building. This fiber will then be placed through the building via a 2" conduit through the wall (conduit through wall to be placed by state). Finally the 48 fiber cable will be spliced to a 48 position fiber panel.</p>
